

## SLDS – Statewide Longitudinal Data System

In 2009, Georgia was awarded 8.9m a grant to develop a statewide clearinghouse for Georgia’s Public Education System. The Statewide Longitudinal Data System (SLDS) is a large part of this grant. Enhancements will roll out through the life of the grant.

Student record information and test data is available to our system for long-term (longitudinal) analysis. Most elements include 4 years data. Included are enrollment, attendance, and test data. Data comes from student record, (June) and from testing data. The data is presented in 3 views, district, school admin, and teacher view.

# Teacher Dashboard

### My Schedule:

- Current active students
- Current year inactive students
- Previous year students

### Attendance Tracker:

- Classroom to school, system, and state
  - Drill Classroom view by BAR

### Statewide Test Results

- Lexile – drill classroom results
- CRCT – drill classroom results

### Course Grades

- Provides a grade distribution table by course

---

### How to locate additional data

- Click a section to view roster information
- CRCT student performance by student (roster)
- Bar indicates performance level
  - CRCT (4 years)
- Special group identifiers are listed
  - Click a category to sort by
- Select a Student Name to view
  - Individual Student Data
    - Demographics
    - Attendance for the past 4 years
    - Assessments
      - Lexile
      - CRCT Results
    - Enrollment History
    - Middle and High school students include posted grades

Click on a CRCT test score to view

- Individual strands and scores
- Click on an individual strand score to view
  - Comparison of student to class to school, to system, to state
  - (FUTURE enhancement) will include exercises to strengthen weaknesses

**Individual Student Data:** Same as clicking from the roster. Demographics, Attendance, Assessment, and Enrollment.

**Enrollment/withdrawal data:** Indicates the number of lines of enrollment for that school, not the number of students enrolled.

**Test Data:** Only reports the major testing period in this database.

**Individual student grades:** This is not a transcript, because courses from other schools and summer school will not be reported on student record (where the data is obtained).

Click About....to view the layout of the information, data can be exported, and printed.
